31.32

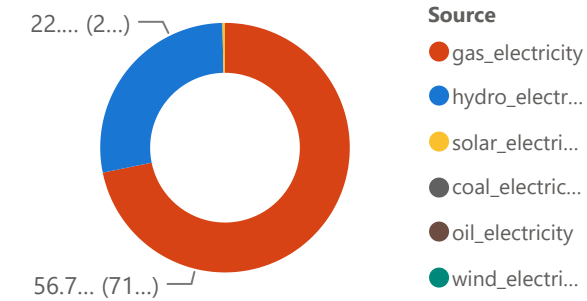

Renewables Share %

37.56

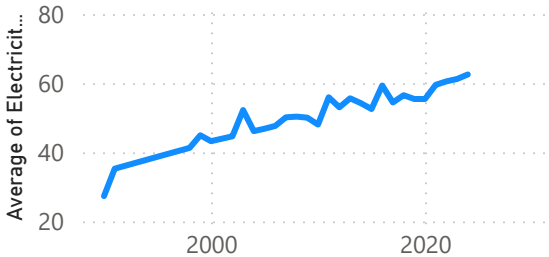

Electricity Generation(TWh)

37.5% of Nigerians
roughly 85 million people
still lack electricity access.

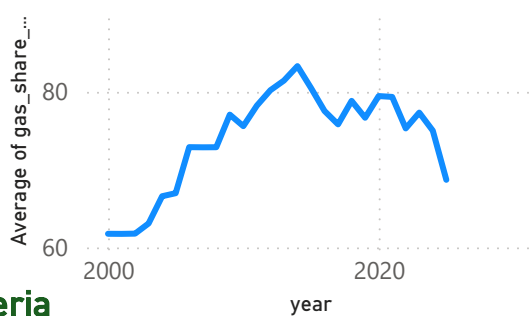

Electricity Generation Mix(2025)

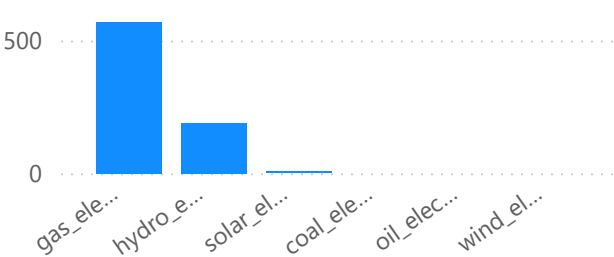

Electricity Access Trend(1990-2024)

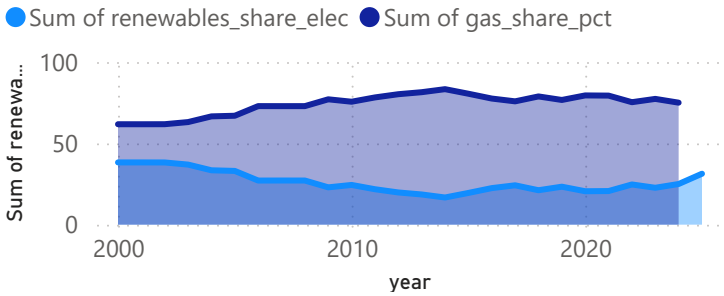

Gas Dependency Trend(2000-2025)

Electricity Generation by Fuel Source

Sum of renewables_share_elec and Sum of gas_share_pct by year

Power Generation Site Across Nigeria

KEY INSIGHTS & RECOMMENDATIONS

- * Gas dependency has climbed to ~69% — diversification is needed to reduce vulnerability
- * Installed capacity (14 GW) far exceeds available capacity (~4.1 GW) — grid maintenance matters as much as new plants
- * Electricity access has grown 27%→62.5% since 1990, but ~38% still lack access

KOGI STATE SPOTLIGHT

World Bank-backed mini-grid program

- * 8,100+ new connections
- * 20 MW peak capacity
- * 21,000+ residents reached
- * Location: Egume/Dekina LGA

A case study in how decentralized mini-grids can close electrification gaps faster than national grid expansion.
